Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 November 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4, 6, 7-16, 17-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Kenny et al.

Kenny discloses an apparatus comprising: a substrate 302, and a plurality of micro-pins 303, Page 4, [0031], thermally coupled to the substrate (see Fig. 10A through Fig. 10E), the plurality of micro-pins arranged in a pixel-like pattern over the substrate; the plurality of micro-pins formed from the substrate; the substrate comprises an integrated circuit (IC) die 99 or integrated with microprocessor, Page 12, [0102]; the plurality of micro-pins coupled to an interface layer 301, the interface layer thermally coupled to the substrate 302; the interface layer comprises a solderable layer, Page 16, [0130]; the layer formed from at least one of copper (Cu), gold (Au), nickel (Ni), aluminum (Al), titanium (Ti), tantalum (Ta), silver (Ag), and Platinum (Pt); the plurality of micro-pins substantially enclosed in a device, the device having a cover disposed over the plurality of micro-pins and comprises an inlet and an outlet; further comprising a pump 32, the

Art Unit: 2835

pump having an outlet, the outlet material transferably coupled to the inlet of the device; each of the plurality of micro-pins comprises a micro-pin having a primitive geometric shape or a complex geometric shape; the plurality of micro-pins arranged to facilitate flow of material across the plurality of micro-pins in at least two directions.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 22-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kenny et al.

Kenny discloses the claimed invention as shown above, except memory device coupled to the wiring board. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to use the disclosed structure for the system that includes the memory device such as flash memory, since the memory device attached to the wiring board is commonly used arrangement in the industry and also it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

Kenny discloses the claimed invention except diamond film layer interface (claim 5). It would have been obvious to one having ordinary skill in the art at the time the invention

Art Unit: 2835

was made to have diamond film for thermal interface as the material having good thermal conductivity and being widely used in the industry, and it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.
